DETAILED ACTION

Election/Restrictions

1. Claims 1-12 are drawn to an isolated nucleic acid encoding a protein with the activity of an annexin or encoding a fragment of such a protein with biological activity, said nucleic acid having the sequence of SEQ ID No. 1 encoding the polypeptide of SEQ ID No. 2, or having the nucleic acid of SEQ ID No. 3, encoding the polypeptide of SEQ ID No. 4, operably-linked to promoters, terminators, and signals for polyadenylation; vectors, host cells, and transgenic plants thereof, classified in class 536, subclass 23.1, for example.

Applicants are reminded that different nucleotide sequences are structurally distinct chemical compounds and are unrelated to one another. These sequences are thus deemed to normally constitute **independent and distinct** inventions within the meaning of 35 U.S.C. 121. Absent evidence to the contrary, each such nucleotide sequence is presumed to represent an independent and distinct invention, subject to a restriction requirement pursuant to 35 U.S.C. 121 and 37 CFR 1.141 et seq.

This requirement is not to be construed as a requirement for an election of species, since each nucleotide sequence is not a member of a single genus of invention, but constitutes an independent and patentably distinct invention.

Art Unit: 1638

Claims 1-12 specifically utilize sequences selected from among SEQ ID Nos. 1, 2, each sequence has a unique nucleotide drawn to ANX1 and ANX2, and the encoding amino acids of SEQ ID Nos. 3 and 4. As such, each nucleotide sequence is considered to be patentably distinct. Furthermore, a search of more than one (1) of the sequences presents an undue burden on the Patent and Trademark Office due to the complex nature of the search and corresponding examination of more than one (1) of the claimed sequences, and the use of its antisense sequence in the claimed method. In view of the foregoing, one (1) sequence is considered to be a reasonable number of sequences for examination. **Accordingly, Applicants are required to elect one (1) sequence from SEQ ID Nos. 1 and 3 Note that this is not a species election.**

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
